PLANT
TULIPS
IN GROUPS
OR CLUMPS

To obtain the greatest pleasure you've ever had from your Tulip planting, plant your bulbs in groups instead of single lines. Use only one variety in each group. Dig a hole large enough to accommodate five or ten bulbs in a group. Set the bulbs in it, spaced 4 to 5 inches apart, and replace the soil.

Rembrandt Tulips

Rightly named after the celebrated painter. Each flower in itself is a wonderful combination of colors. Every bloom is fantastically striped and feathered and beautifully flamed. There are many amazing color combinations and variations—flame-red on white ground, gold color on brown base, rose spotted on lilac base, etc. Height 26 in. *Superfine Mixture*.

Fantastic PARROT TULIPS

*Exciting NEW
Peacock Tulips*

A new hybrid group with the peculiar characteristic of unfurling their blossoms full and wide, thereby revealing the magnificent color variations of the interiors in a manner similar to the peacock, which proudly displays its feathers. They display an amazing variety of different shades and the foliage is distinctively marked with purple-brown, similar to the parent plant Greigii. The flowers are long lasting, blooming continuously from the time of the early to the late-flowering tulips. Heights vary from 8 to 18 in. Supply is still limited.
